

VIERSEN, A.P. VAN & WILDE, B. DE, 2010. *Goldius angusticalix* sp. nov. (Trilobita, Scutelluidae) from the Couvin Formation (Middle Devonian) in Belgium, with a preliminary list of scutelluid species from the Ardennes. *Geologica Belgica*, 13: 153-162.

Scutelluids are rare trilobites in the Devonian of the Ardennes (Belgium, France). *Goldius angusticalix* sp. nov. and *Scabriscutellum* sp. A are recorded from the Couvin Formation (lower Eifelian) in Nismes, Belgium. An overview is given of the regional distribution in the Eifelian of *Goldius* de Koninck (= *Brontes* Goldfuss; *Bronteus* Goldfuss; *Goldfussia* Bronn; *Calycoscutellum* Archinal), *Scabriscutellum* Richter & Richter, *Septimopeltis* Přibyl & Vaněk and *Scutellum* Pusch. Additionally, analogies between the early Eifelian trilobite faunas of Nismes and Üxheim (Germany) are briefly discussed.
